Investment Philosophy

The JAG Large Cap Growth strategy seeks to identify and invest in a focused but diversified portfolio of US-listed large capitalization companies. The portfolio typically consists of 30-40 securities that exhibit superior growth characteristics, strong fundamentals, and compelling price appreciation potential.

Capital markets can be inefficient in the short/intermediate term, and JAG believes this creates differentiated opportunities for active long-term investors. Our approach to portfolio construction is benchmark-aware, with active risk monitored relative to the Russell 1000 Growth Index. Within this framework, we maintain the flexibility to meaningfully overweight and underweight sectors and securities based upon our highest-conviction ideas. The JAG Large Cap Growth strategy should be expected to exhibit moderate annual portfolio turnover, driven by a proactive sell discipline and risk-management framework.

Investment Process

Portfolio holdings are typically sourced from the largest 40% (by market capitalization) of companies within the Russell 3000 Index. The strategy avoids investing in Master Limited Partnerships (MLPs) and Real Estate Investment Trusts (REITs). Additionally, JAG does not invest in companies that manufacture tobacco, distilled spirits, or offensive weaponry.

Idea generation begins with a proprietary multi-factor model which is utilized to sort and rank all companies in our investable universe. The screen incorporates datapoints that we believe help identify companies with superior growth attributes, strong fundamentals, and compelling price appreciation potential. JAG's research team typically focuses its efforts on companies in the top quartile of factor model scores. Analysts then perform fundamental research on qualifying securities, to further identify the most compelling potential investment opportunities. Using this information, the team selects and maintains approximately 100 stocks on what we refer to as our Focus List. As part of the ongoing due diligence process, companies undergo qualitative evaluation by the covering analyst. This involves a proprietary 16-question multiple-choice framework that requires analysts to gauge their impressions of each company's Market, Moat, Management, Messaging, and Momentum. This framework helps contextualize each stock's relative attractiveness based on qualitative considerations.

JAG employs a proactive sell discipline to mitigate the risk of permanent capital loss, which we believe to be an underappreciated risk for growth investors. JAG's sell discipline includes a variety of sell triggers, including excess concentration risk, a negative earnings surprise that impacts forward assumptions, unexpected changes in top management, the emergence of regulatory issues, poor relative or absolute price performance, or disruption of a company's key products or services. We believe our proactive sell discipline is a key component of our approach to risk management.
